D-LEAD LEAD DETECTION KITS

PRODUCT DESCRIPTION

D-Lead Lead Detection Kits are a ready to use test that quickly detect the presence of lead on skin and most surfaces within seconds.
The tests provide sensitive detection for lead from metal alloys, oxides, salts, dust and lead paint, and are able to detect concentrations as low as 20 micrograms total.

APPLICATIONS

D-Lead Lead Detection Kits quickly detect the presence of lead on a variety of surfaces including skin, tables, floors, ceramics, glazes, paint and solder.
The test kit provides an easy, economical way to test for the presence of lead on most surfaces and materials.
Simply spray the hand or other surface with Solution 1 then repeat the process with Solution 2 – the resulting discoloration indicates the presence of Lead.
The complete test kit is an inexpensive personal hygiene training and quality control tool.

AVAILABLE FORMS

<u>Part No</u>	<u>Size</u>	<u>Packaging</u>
04442	Test Kits Only	Carton of 120
04443	Solution 1 & 2/Test Kits	24 oz /Carton of 800
